DETAILED ACTION

Drawings

1. The drawings filed December 13, 2004 appear to be informal and are acceptable for examination purposes only.
2. The drawings filed December 13, 2004 are objected because all boxed in the drawings should have descriptive legends attached. Thus, the boxes in Figure 1 should be labeled.
3. Formal drawings are required responsive to this Office action.

Preliminary Amendment

4. The preliminary amendment filed December 13, 2004 has been entered and considered.

Priority

Information Disclosure Statement

6. The information disclosure statement filed December 13, 2004 has been entered and considered. An initialed copy of the PTO-1449 by the Examiner is attached.

Oath/Declaration

7. The oath filed December 10, 2004 fails to claim priority. The box is unchecked.

Information Disclosure Statement

8. The information disclosure statement filed December 10, 2004 has been entered and considered. An initialed copy of the PTO-1449 by the Examiner is attached.

Specification

9. Applicant is reminded of the proper content of an abstract of the disclosure.

A patent abstract is a concise statement of the technical disclosure of the patent and should include that which is new in the art to which the invention pertains. If the patent is of a basic nature, the entire technical disclosure may be new in the art, and the abstract should be directed to the entire disclosure. If the patent is in the nature of an improvement in an old apparatus, process, product, or composition, the abstract should include the technical disclosure of the improvement. In certain patents, particularly those for compounds and compositions, wherein the process for making and/or the use thereof are not obvious, the abstract should set forth a process for making and/or use thereof. If the new technical disclosure involves modifications or alternatives, the abstract should mention by way of example the preferred modification or alternative.

The abstract should not refer to purported merits or speculative applications of the invention and should not compare the invention with the prior art.

Where applicable, the abstract should include the following:

- (1) if a machine or apparatus, its organization and operation;
- (2) if an article, its method of making;
- (3) if a chemical compound, its identity and use;
- (4) if a mixture, its ingredients;
- (5) if a process, the steps.

Extensive mechanical and design details of apparatus should not be given.

10. The abstract of the disclosure is objected to because presence of "Figure" at the end of the Abstract is deemed unnecessary and should be deleted. Correction is required. See MPEP § 608.01(b).

11. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

12. The disclosure is objected to because of the following informalities: there is no brief description of the drawings section in the specification.

Appropriate correction is required.

Allowable Subject Matter

13. Claims 1-12 are allowed.

Examiner's Reasons for Allowance

14. The following is an examiner's statement of reasons for allowance:

The prior art fails to render obvious the claimed method and radar apparatus including, inter alia, a high-frequency oscillating device which emits a first and second carrier frequency signals, a first pulse-shaping device, a first switching device, a second pulse-shaping device, a second switching device which switches the first and second carrier frequency signals as a function of the second pulse signal and sends out first and second delayed radar pulse signals, a receiving antenna which receives first and second radar signals, a mixing device which mixes the received first and second radar signals with the first and second delayed radar pulse signals and emits first and second mixed signals, a control device which determines an amplitude signal from the first mixed signal and the second mixed signal, whereby a first phase difference between the first received radar signals and the first delayed radar pulse signals differs from a

second phase difference between the second received radar signals and the second delayed radar pulse signals as operatively and functionally claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

15. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited prior art show various radar systems.
